Transform the space around you with smart lighting from Legrand.

radiant® RF Lighting Control
WHAT IS “RF” LIGHTING?

Our Lighting Control devices communicate using RF (Radio Frequency) technology. This allows seamless communication between system components and wireless control from a single app.
Enjoy complete control over your home’s lighting.
Now you have the ability to control all lights inside and out, select lighting scenes for any mood or activity, and reduce energy costs at the touch of a button.

Forgot to turn lights off? No problem.
With Legrand’s Lighting Control App, you can conveniently control your home’s lighting from wherever you are – at home, or on vacation.

Set the scene for a perfect evening.
Scenes can be created to match your lifestyle. With the touch of a button, adjust multiple lights throughout the room or home to the perfect level for your dinner party.

Ensure your family is safe.
Light up a dark stairway or illuminate your front porch to ensure your family has a safe, bright path. Use the Repeater and Away Emulator to capture your typical lighting patterns and emulate them while you’re away – a powerful security feature.*

LIGHTING CONTROL AT YOUR FINGERTIPS

Whether you’re at home or away, the Legrand Lighting Control mobile app gives you complete control of your home’s lighting – using your Android or iOS smartphone, tablet or Apple Watch.

DON’T LIFT A FINGER

Command your lights touch-free with voice activated controls through the Google Assistant and Amazon Alexa.

Alexa, turn off the bedroom lights.

Ok Google, turn on the kitchen.
GO AHEAD. CREATE A SCENE.

Smart lighting coordinates with your schedule and your preferences. Easily program one or more lights to turn on or off at a certain time of day - like sunrise or sunset. With QMotion by Legrand, you can even control your shades.

Create a “goodnight” scene
Turn off all lights when you turn in for the night.

Create a “welcome home” scene
Illuminate the walkway, turn on entry lights and brighten the kitchen in preparation for cooking.

Create a “good morning” scene
When your day dawns, schedule lights to turn on and shades to open so you can ease into your routine.

Create a “movie night” scene
With the tap of a button, dim family room lights and close the shades for movie night.

The Scene Controller (LC2303)
is a convenient, in-wall keypad that allows you to control your pre-configured scenes at the touch of a button.

Mobile App Shade Control with QMotion
AN EASY SWITCH

DESIGN THAT’S A STEP ABOVE ORDINARY
Featuring a clean, low-profile design with no screws in sight, these Wi-Fi ready switches and dimmers coordinate perfectly with all other radiant devices.

QUICK INSTALLATION, LASTING IMPACT
radiant RF light switches and dimmers are installed using existing electrical wiring, making updates a breeze. Connect the Whole House Lighting Controller to your home network with an Ethernet cable, and pair your device directly from the Legrand Lighting Control app.
